www.linkedin.com/in/anthony-jekapu-112209345/

I am a creative professional with expertise in graphic design, motion graphics and digital marketing. I craft visually engaging content that communicates clearly and effectively across platforms. With a strong foundation in design principles, animation and branding, I bring ideas to life through compelling visuals and strategic marketing campaigns. Whether it's static designs, animated content, or performance-driven digital strategies, I deliver work that connects with audiences and drives results.

BROCHURE

The need to envision a twenty-year development trajectory for Africa is important, as Africa needs to revise and adapt its development agenda to the ongoing structural transformations, increased peace and reduction in the number of conflicts, renewed economic growth and rising progress for the people. Africa needs to embrace a new development paradigm that is people-centered, development, gender, equality and youth empowerment, changing the role of the state, increased globalization and the ICT revolution, the increased unity of Africa which makes it global power to be reckoned with and capable of revelling support around its own common agenda, and emerging development and investment opportunities in areas such as agri-business, infrastructure development, health and education as well as the value addition in African commodities.

Agenda 2025 encapsulates not only Africa's Aspirations for the future, but also identifies key Flagship Programmes which can boost Africa's economic growth and development and lead to the rapid transformation of the continent. Agenda 2025 also identifies key activities to be undertaken in its 10 year implementation Plan which will ensure that Agenda 2025 delivers both quantitative and qualitative Transformational Outcomes for Africa's people.

National & RESCs Development Priorities

Agenda 2062 not only considers Africa's continental growth aspirations but also acknowledges that for the whole continent to develop the premise of Agenda 2062 must be adopted at regional and country level. At the inception of Agenda 2062, the National Development Plans of Member States were, as well as the strategic plans of the regional Economic Communities, reviewed and the focus areas of their development priorities have been included in the First Ten Year Implementation Plan to ensure that their policies in the near-term converge with the priority areas contained in the 50 year framework development.

AGENDA 2062 is Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future. It is the continent's strategic framework that aims to deliver on its goal for inclusive and sustainable development and is a concrete manifestation of the pan-Africa's drive for unity, self-determination, freedom, progress and collective prosperity pursued under Pan-Africanism and African Renaissance.

- Sustainable inclusive economic growth
- Human Capital Development
- Agricultural value addition and agro-businesses development
- Employment generation, especially the youth and females
- Social Franchising
- Gender/ Women development and youth empowerment
- Good governance including capable institutions
- Infrastructural development
- Science, Technology, Innovation
- Manufacturing-based industrialisation
- Peace and security
- Culture, Arts and Sports

English Projects of Agenda 2063

As a result, Agenda 2063 not only calls for a 20/20/20 continental growth aspirations but also acknowledges that the whole continent to develop the promise of Agenda 2063 must be adopted at regional and country level. In the exception the Agenda's prospects of Agenda 2063 reflects key programmes and initiatives which have been identified as key to accelerating Africa's economic growth and development as well as planning for the continent's future. The continent's growth and development is being driven by the common identity by embracing our history and civilisation, and the continent's growth and development is being driven by embracing our history and civilisation, and the continent's growth and development is being driven by embracing our history and civilisation.

INTEGRATED HIGH SPEED TRAIN NETWORK

The project aims to connect all African capitals and commercial centers through an African high speed train network thereby facilitating the movement of goods, factor services and people. The improved connectivity it will also aim to reduce transport costs and relieve congestion of current and future systems.

FORMULATION OF AN AFRICAN COMMODITIES STRATEGY

The development of a continental commodities strategy is seen as key to enabling African countries to add value, attract higher rents from their commodities, integrate into the global value chains, and promote vertical and horizontal diversification anchored in value addition and local content development. The strategy aims to transform Africa from simply being a raw materials supplier for the rest of the world to a continent that actively uses its own resources to produce the economic development of Africans.

ESTABLISHMENT OF THE AFRICAN CONTINENTAL FREE TRADE AREA (AFCTA)

Accelerate intra-African trade and boost Africa's trading position in the global market place. The AfCFTA aims to significantly accelerate growth of intra-Africa and use trade more effectively as an engine of growth and sustainable development by doubling intra-Africa trade, strengthening Africa's competitive edge and policy space in global trade negotiations.

THE AFRICAN PASSPORT AND FREE MOVEMENT OF PEOPLE

Remove restrictions on Africa's ability to import, work and live within their own continent. The initiative aims at countering Africa's loss, which remains generally restrictive on movement of people despite political commitments to bring down borders with the view to providing the issuance of visas by Member States to enhance free movement of all African citizen in all African countries.

IMPLEMENTATION OF THE INGA DAM PROJECT

The development of the Inga Dam is expected to generate 43,200 MW of power to support current regional loads and their combined service to transform Inga from traditional to modern sources of energy and ensure access of oil Africans to clean and affordable electricity.

ESTABLISHMENT OF A SINGLE AFRICAN AIR-TRANSPORT MARKET (SAAATM)

The SAAIM aims to ensure the regional connectivity between the coastal cities of Africa and create a single unified air transport market in Africa as an impetus to the continent's economic integration and growth. Moreover, SAAIM provides for the full liberalization of intra-African air transport services in terms of market access, traffic rights for scheduled and freight or services by eligible airlines thereby improving air services' connectivity and cost efficiency. It removes restrictions on ownership and provides for the full liberalization of frequencies, flights and capacity. It also provides eligibility criteria for African countries' entry, safety and security standards, mechanisms for fair competition and dispute settlement as well as consumer protection.

ESTABLISHMENT OF AN ANNUAL ECONOMIC FORUM

The annual African Economic Review is a multi-stakeholder meeting that brings together the African political leadership, the private sector, academics and civil society to reflect on how to accelerate Africa's economic transformation harnessing its vast resources to enhance the development of the African people. The forum provides key opportunities to do so at the continental level, to ensure economic development and progress measured to be taken to realize the Aspirations and goals of Agenda 2063.
